

Sempra Energy Celebrates Operational Milestones At Cameron LNG

May 14, 2019

- President of the United States and Leading International, Federal, State and Local Officials Visit 'World-Class' Cameron LNG Facility in Louisiana - The Celebration Coincides With Today's LNG Production Announcement

SAN DIEGO, May 14, 2019 /PRNewswire/ -- [Sempra Energy](#) (NYSE: SRE) today celebrated the completion of construction of Train 1 of the Cameron LNG export project in Hackberry, La., with a group of international, federal, state and local officials, including the U.S. president and members of the U.S. administration. The celebratory visit coincided with [today's announcement](#) that Cameron LNG is producing liquefied natural gas (LNG) from the first liquefaction train of the three-train facility, a major commissioning milestone.

Sempra Energy set a goal in 2018 to become the largest developer of North American LNG export infrastructure, targeting 45 million tonnes per annum of LNG export capacity to serve global markets.

"With a renaissance in domestic energy production, Sempra Energy is pleased to advance America as one of the world's largest exporters of LNG," said Jeffrey W. Martin, chairman and CEO of Sempra Energy. "We are committed to providing a cleaner fuel source to the global markets while supporting job creation right here at home."

Over 11,000 highly skilled workers have contributed to the construction of this U.S. energy infrastructure project, including welders, iron workers, insulators, electricians, construction workers, logistics professionals and other important vocations.

Cameron LNG Phase 1 is one of five LNG projects Sempra Energy is developing in North America. Other projects under development include Cameron LNG Phase 2, previously authorized by the Federal Energy Regulatory Commission (FERC), which could include up to two additional liquefaction trains and up to two additional LNG storage tanks; Port Arthur LNG in Texas, which recently was approved by FERC; and Energia Costa Azul LNG Phase 1 and Phase 2 in Mexico.

"Sempra Energy is developing five world-class projects that offer more choice to our customers, including brown-field locations, access to both the Asian and European markets, and flexibility and scalability to meet growing demand," added Martin.

Development of Sempra Energy's LNG export projects are contingent upon obtaining binding customer commitments, completing the required commercial agreements, securing all necessary permits, obtaining financing, other factors, and reaching final investment decisions. In addition, the ability to successfully complete construction projects, such as the Cameron LNG export project, is subject to a number of risks and uncertainties.

Cameron LNG is jointly owned by affiliates of Sempra LNG, Total, Mitsui & Co., Ltd., and Japan LNG Investment, LLC, a company jointly owned by Mitsubishi Corporation and Nippon Yusen Kabushiki Kaisha (NYK). Sempra Energy indirectly owns 50.2% of Cameron LNG.

Sempra Energy's mission is to be North America's premier energy infrastructure company. With 2018 reported revenues of more than \$11.6 billion, the San Diego-based company is the utility holding company with the largest U.S. customer base. The Sempra Energy companies' more than 20,000 employees are focused on delivering energy with purpose to approximately 40 million consumers worldwide. Sempra Energy has been consistently recognized for its leadership in diversity and inclusion, and social responsibility, and is a member of the S&P 500 Utilities Index and the Dow Jones Utility Index.

This press release contains statements that are not historical fact and constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by words such as "believes," "expects," "anticipates," "plans," "estimates," "projects," "forecasts," "contemplates," "assumes," "depends," "should," "could," "would," "will," "confident," "may," "can," "potential," "possible," "proposed," "target," "pursue," "outlook," "maintain," or similar expressions or when we discuss our guidance, strategy, plans, goals, vision, mission, opportunities, projections, initiatives, objectives or intentions. Forward-looking statements are not guarantees of performance. They involve risks, uncertainties and assumptions. Future results may differ materially from those expressed in the forward-looking statements.

Factors, among others, that could cause our actual results and future actions to differ materially from those described in any forward-looking statements include risks and uncertainties relating to: actions and the timing of actions, including decisions, new regulations and issuances of authorizations by the U.S. Department of Energy, Federal Energy Regulatory Commission, U.S. Environmental Protection Agency and Pipeline and Hazardous Materials Safety Administration, states, cities and counties, and other regulatory and governmental bodies in the U.S. and other countries in which we operate; the success of business development efforts and construction projects, including risks in (i) obtaining or maintaining authorizations; (ii) completing construction projects on schedule and budget; (iii) obtaining the consent of partners; (iv) counterparties' ability to fulfill contractual commitments; and (v) the ability to realize anticipated benefits from any of these efforts once completed; the availability of natural gas and liquefied natural gas, and natural gas pipeline and storage capacity; equipment failures; changes in energy markets; volatility in commodity prices; moves to reduce or eliminate reliance on natural gas; risks posed by actions of third parties who control the operations of our investments; weather conditions, natural disasters, accidents, equipment failures, explosions, terrorist attacks and other events that disrupt our operations, damage our facilities and systems, cause the release of harmful materials, and subject us to third-party liability for property damage or personal injuries, fines and penalties, some of which may not be covered by insurance (including costs in excess of applicable policy limits) or may be disputed by insurers; cybersecurity threats to storage and pipeline infrastructure, the information and systems used to operate our businesses; the impact of federal and state tax reform and our ability to mitigate adverse impacts; changes in foreign and domestic trade policies and laws, including border tariffs, revisions

to or the replacement of international trade agreements, and changes that make our exports less competitive or otherwise restrict our ability to export; and other uncertainties, some of which may be difficult to predict and are beyond our control.

These risks and uncertainties are further discussed in the reports that Sempra Energy has filed with the U.S. Securities and Exchange Commission (SEC). These reports are available through the EDGAR system free-of-charge on the SEC's website, www.sec.gov, and on the company's website at www.sempra.com. Investors should not rely unduly on any forward-looking statements. These forward-looking statements speak only as of the date hereof, and the company undertakes no obligation to update or revise these forecasts or projections or other forward-looking statements, whether as a result of new information, future events or otherwise.

Sempra LNG and Port Arthur LNG, LLC are not the same as the California Utilities, San Diego Gas & Electric Company (SDG&E) or Southern California Gas Company (SoCalGas), or Oncor Electric Delivery Company LLC (Oncor) and are not regulated by the California Public Utilities Commission.
