15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis in the Expected Minimum and Maximum Adjusted Conversion Rates increased from 0.7698 and 0.9430 shares of Sempra preferred stock to 0.7712 and 0.9448 shares, respectively, of Sempra common stock for each Series A share. The value of the increase at the Expected Minimum and Maximum Adjusted Conversion Rates if 0.0014 and 0.0018, respectively, per Series A share. To the extent support by Earnings & Profits, the minimum 0.0014 or maximum 0.0018 per share is taxable to Series A holders and increases tax basis in their Series A stock. Sempra currently anticipates having adequate Earnings & Profits to support that the entire minimum 0.0014 or maximum 0.0018 per share is taxable. Should Sempra's Earnings & Profits be inadequate to support the entire minimum 0.0014 or maximum 0.0018 as taxable, this Form 8937 will be revised.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates
