Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ On February 25, 2020, the Board of Directors of Sempra Energy ("Sempra") declared a quarterly common stock dividend which will be paid on April 15, 2020, to holders of record of common stock as of the close of business on March 20, 2020. As a result of this cash dividend to common stockholders, effective April 15, 2020, the Conversion Rate at which each share of 6.00% Mandatory Convertible Preferred Stock, Series A ("Series A") can be converted into common stock was increased. The value of the Conversion Rate increase is a deemed distribution for tax purposes.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The Expected Minimum and Maximum Adjusted Conversion Rates increased from 0.7681 and 0.9410 shares of Sempra preferred stock to 0.7698 and 0.9431 shares, respectively, of Sempra common stock for each Series A share. The value of the increase at the Expected Minimum and Maximum Adjusted Conversion Rates is 0.0017 and 0.0021, respectively, per Series A share. To the extent supported by Earnings & Profits, the minimum 0.0017 or maximum 0.0021 per share is taxable to Series A holders and increases tax basis in their Series A stock. Sempra currently anticipates having adequate Earnings & Profits to support that the entire minimum 0.0017 or maximum 0.0021 per share is taxable. Should Sempra's Earnings & Profits be inadequate to support the entire minimum 0.0017 or maximum 0.0021 as taxable, this Form 8937 will be revised.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ See attachment

Part II Organizational Action (continued)

17 List the applicable Internal Revenue Code section(s) and subsection(s) upon which the tax treatment is based ▶ IRC Sections 301, 305 (b) (2) . 305 (c) , 316.

Notes:

- Conversion Ratio Adjustment Factor [C] formula: $(C = B - T / B - A)$

- Series A Prospectus Supplement, dated January 4, 2018, definition of stock price:

"For the purposes of determining the adjustment to the fixed conversion rate for the purposes of: clauses (2), (4) (but only in the event of an adjustment thereunder not relating to a spin-off) and (5) above, the "current market price" of our common stock is the average VWAP per share of our common stock over the five consecutive trading day period ending on the trading day immediately preceding the "ex-date" (as defined below) with respect to the issuance or distribution requiring such computation" - S-91

- "... "VWAP" per share of our common stock on any trading day means the per share volume weighted average price as displayed on Bloomberg page "SRE <EQUITY>AQR" (or its equivalent successor if such page is not available) in respect of the period from 9:30 a.m. to 4:00 p.m., New York City time, on such trading day; or, if such price is not available, "VWAP" means the market value per share of our common stock on such trading day as determined, using a volume-weighted average method, by a nationally recognized independent investment banking firm retained by us for this purpose, which may include any of the underwriters for this offering. The "average VWAP" means the average of the VWAPs for each trading day in the relevant period." - S82
